Our Vision

Tampnet's vision is to deliver first-class connectivity to offshore and global industries, enabling digitalisation and sustainability.

Our Mission

Tampnet owns and operates the world's largest offshore network, incorporating the latest technology to provide our customers with the most reliable and complete connectivity solutions.

From site to shore, our low-latency, high-capacity network enables our customers to achieve more through improved sustainability and efficient, safe and digitalized operations.

Our Business Areas

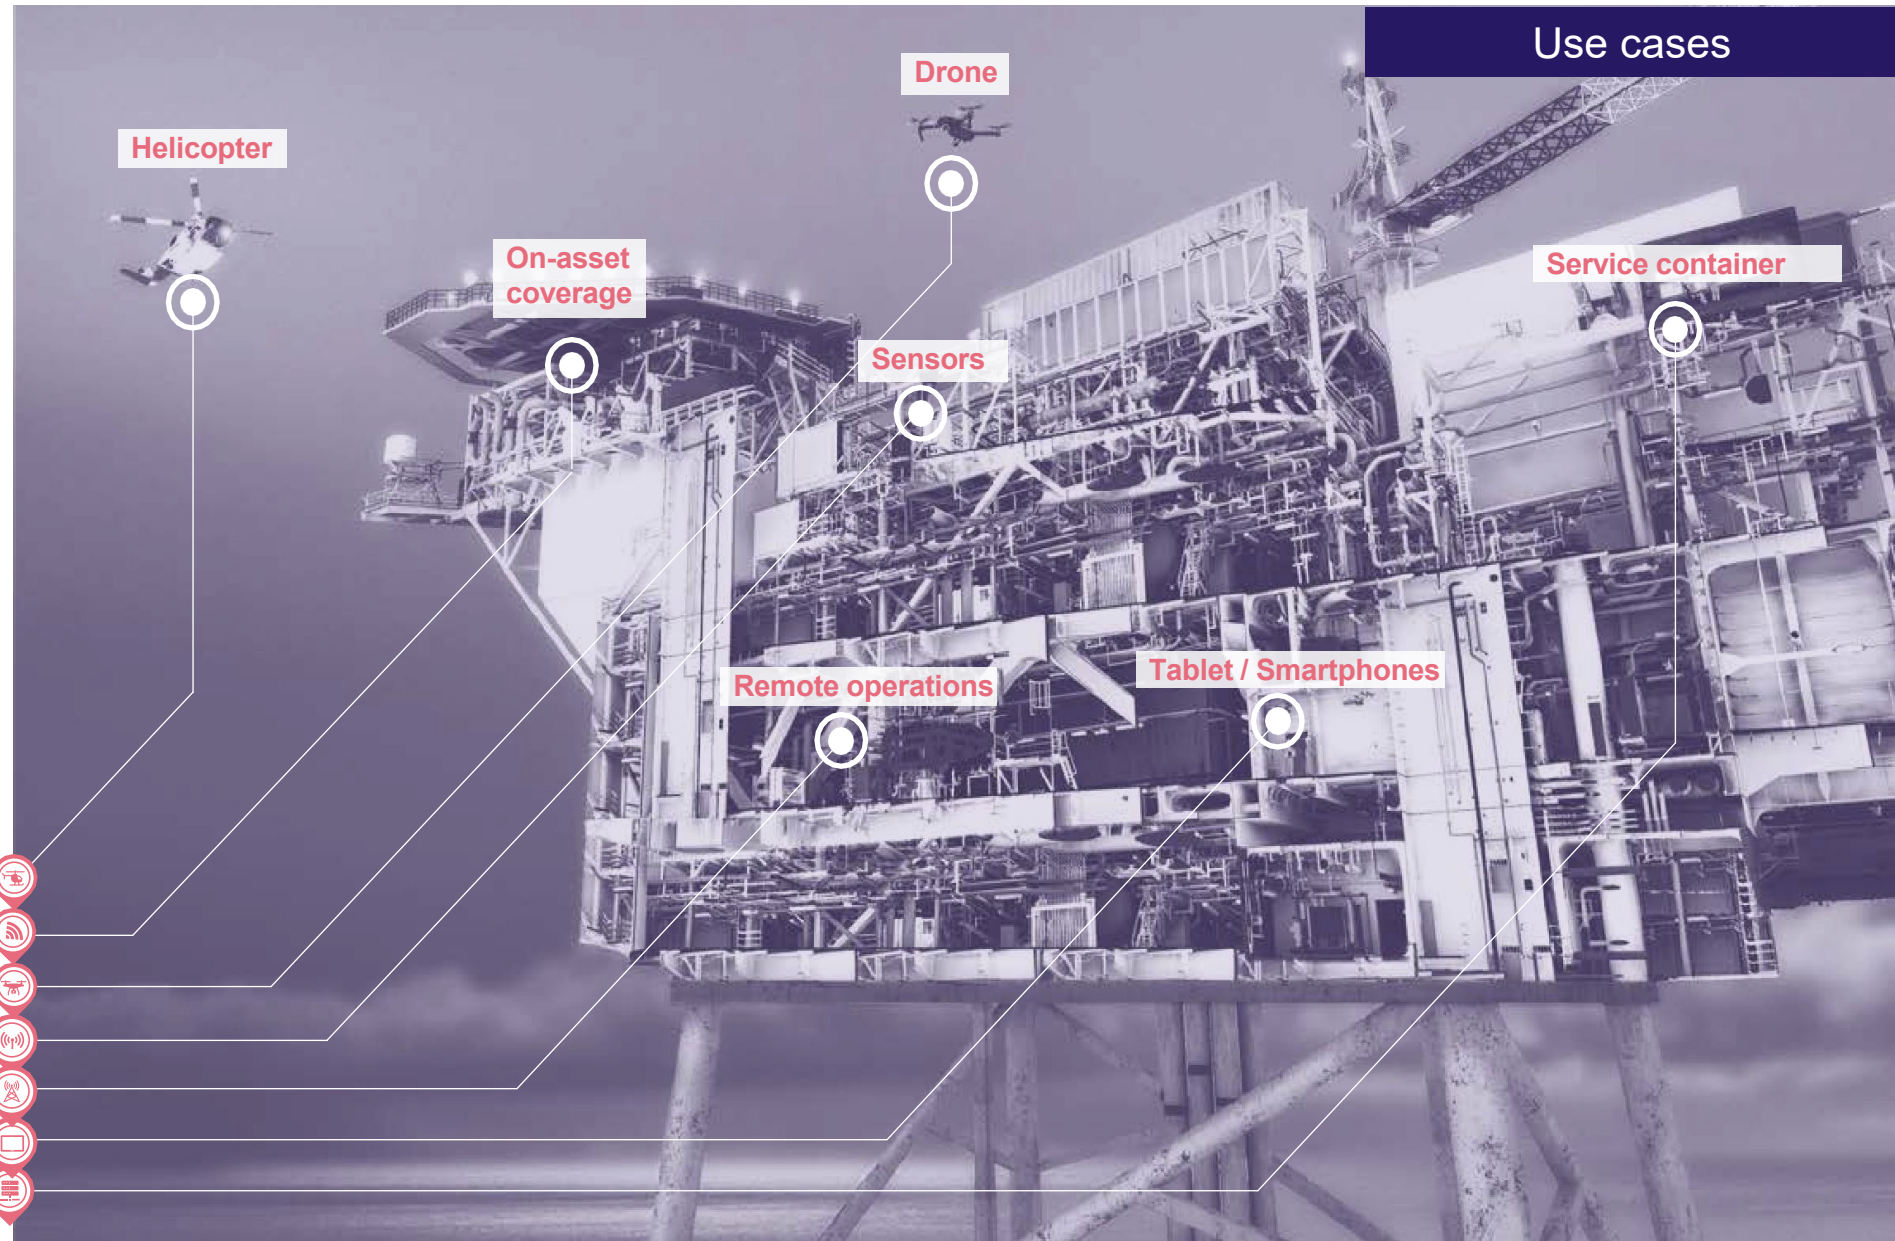

Connectivity is essential to all offshore activities

Tampnet has installed 25 private networks with contracts secured for a further 22

We keep offshore workers connected, allowing them to access real-time data, optimize operations and to collaborate more easily across installations.

And we always focus on security – protecting our customers from digital threats and cyber attacks.

Decrease emergency response times

Connects platforms, creating network of connectivity

Inspection tasks with greater efficiency / H&S

More efficient monitoring and maintenance

Ability to support more workstreams from onshore

Enables digitalisation of operations

Collects / processes data for operational decision making

What makes Tampnet a great infrastructure asset?

Leading provider of mission critical communication infrastructure to offshore customers

Inflation-linked, long duration contracts with loyal, blue chip and diversified customer base

Superior and non-replicable asset base, unique independent fibre operator in core markets

Key enabler, and beneficiary of the energy transition

Strong platform to capture growth upsides
